

# Billing Get Well

To succeed, your clinic needs a comprehensive RCM solution tailored specifically to meet your clinic's unique needs.

Our solution addresses common pain points, such as billing errors, claim denials, and inefficient workflows.

## Billing & Collections Results You Can Measure

### Financial Dashboards

Experience the power of our tailored dashboards, effortlessly integrating financial transparency and practice KPIs, meticulously calibrated to industry benchmarks.

### Insurance Reverified

Insurance carriers should receive only accurate claims for prompt processing. To ensure this, we reverify 100% of patient insurance information before submitting claims.

### Maximize Reimbursement

A key element of our process involves pinpointing deficiencies in charting, which can promptly address and rectify to maximize your reimbursement potential.

### Coding Optimization

Our certified coders analyze each visit's notes comparing them to the charges, ensuring the charges are medically justified and every item is accounted for and billed.

### Automated Invoice Delivery

Transform your operations with an automated invoicing and collection solution. Seamlessly send invoices to employers & patients, ensuring current & past due invoices are delivered weekly.

### Aggressive Appeals

Effectively managing denial and appeals can make or break your financial success. Instead of simply disregarding unpaid charges, take control and maximize your chances of success.
